

*When Production out spaces
Expectation....*

MERIDIAN

When production out spaces expectation or carryover is high, the Grain Ring by Meridian is the low cost alternative that can provide a temporary solution to your volume crisis.

- Corrugated galvanised panels are rolled and crimped on a line. This deep corrugation in 22 or 18 gauge material will provide a strong, reusable system for temporary grain storage.
- The *Grain Ring* package comes complete with tarp hooks and hardware which can be installed on the first available seam line down from the top at intermittent intervals to fasten tarp and rope to the ring.
- Using the provided Grain Ring Stiffeners, simply mount these in pre-punched locations around the diameter of the Ring and drive these into the ground to simply provide temporary security against wind when the ring is empty and untarped.
- The supplied industrial gasket can simply be installed on the top edge of your ring for the entire diameter protecting your tarp from any sharp edges of the steel panels.

Specifications

Diameter	Size	Capacity (tonnes)	Suggested Auger Length (min)	Weight (kg)
40'	12.2m Dia x 1.1m High	185	43'	383
51'	15.6m Dia x 1.1m High	340	56'	490
62'	19m Dia x 1.1m High	560	60'	598
70'	21.3m Dia x 1.1m High	750	72'	670
77'	23.4m Dia x 1.1m High	975	75'	740
92'	27.5m Dia x 1.1m High	1545	85'	1221
106'	32m Dia x 1.1m High	2300	95'	1561

- *All capacities are approximate. Complete with: Panels, Tarp Hooks, Edge Trim (for protection of tarp) and all required fasteners.*
 - *560gsm (3 year warranty) purpose manufactured tarps available*
 - *Ground Sheets (260gsm) available*
- ** Capacity may vary depending on type of grain stored and moisture content . Calculations based on Canadian conditions**
